

Hello neighbors! I hail from The Bronx and am now happy to call Jackson Heights my neighborhood going on ten years now.

A Graduate of The Marxe School of Public Affairs at Baruch College, and with a strong foundation in public policy and city planning; I've spent much of my career split between the real estate and public health industries.

At Montclair Gardens, I have largely overseen major technology projects going back the last ten years — including the initial networking and wireless installations in the common areas; the network closet; the camera system upgrade; among other integrations. This serves as the backbone to many of the amenities in the building.

I am excited to run for the board again this year to see what improvements can be made to our building, especially with our new management company at the helm. I look forward to working to further modernize Montclair Gardens to create a more leisurely and safer environment for all residents, even those in the neighborhood that walk past our building every day.

Your involvement and input is always welcome!

Thank you!

Baruch Seecharan
